1. Significant Accounting Policies

Basis of Presentation

With its subsidiaries, Potash Corporation of Saskatchewan Inc. ("PCS") – together known as "PotashCorp" or "the company" except to the extent the context otherwise requires – forms an integrated fertilizer and related industrial and feed products company. These unaudited interim condensed consolidated financial statements are based on International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS"), and have been prepared in accordance with International Accounting Standard ("IAS") 34, "Interim Financial Reporting." The accounting policies and methods of computation used in preparing these unaudited interim condensed consolidated financial statements are consistent with those used in the preparation of the company's 2014 annual consolidated financial statements.

These unaudited interim condensed consolidated financial statements include the accounts of PCS and its subsidiaries; however, they do not include all disclosures normally provided in annual consolidated financial statements and should be read in conjunction with the company's 2014 annual consolidated financial statements. In management's opinion, the unaudited interim condensed consolidated financial statements include all adjustments necessary to fairly present such information. Interim results are not necessarily indicative of the results expected for the fiscal year.

These unaudited interim condensed consolidated financial statements were authorized by the audit committee of the Board of Directors for issue on August 5, 2015.

Standards, Amendments and Interpretations not yet Effective and not Applied

The International Accounting Standards Board ("IASB") and International Financial Reporting Interpretations Committee ("IFRIC") have issued the following standards and amendments or interpretations to existing standards that were not yet effective and not applied as at June 30, 2015. The company does not anticipate early adoption of these standards at this time.

Standard	Description	Impact	Effective Date ⁽¹⁾
Amendments to IAS 1, Presentation of Financial Statements	Issued to improve the effectiveness of presentation and disclosure in financial reports, with the objective of reducing immaterial note disclosures.	The company is reviewing the standard to determine the potential impact, if any.	January 1, 2016, applied prospectively.
Amendments to IAS 16, Property, Plant and Equipment and IAS 38, Intangible Assets	Issued to clarify acceptable methods of depreciation and amortization.	The company is reviewing the standard to determine the potential impact, if any; however, no significant impact is anticipated.	January 1, 2016, applied prospectively.
Amendments to IFRS 11, Joint Arrangements	Issued to provide additional guidance on accounting for the acquisition of an interest in a joint operation.	The company is reviewing the standard to determine the potential impact, if any; however, no significant impact is anticipated.	January 1, 2016, applied prospectively.
IFRS 15, Revenue From Contracts With Customers	Issued to provide guidance on the recognition of revenue from contracts with customers, including multiple-element arrangements and transactions not previously addressed comprehensively, and enhance disclosures about revenue.	The company is reviewing the standard to determine the potential impact, if any.	The IASB has voted to confirm a one-year deferral of the effective date to January 1, 2018, applied retrospectively with certain limitations.
IFRS 9, Financial Instruments	Issued to replace IAS 39, providing guidance on the classification, measurement and disclosure of financial instruments and introducing a new hedge accounting model.	The company is reviewing the standard to determine the potential impact, if any.	January 1, 2018, applied retrospectively with certain exceptions.

⁽¹⁾ Effective date for annual periods beginning on or after the stated date.

2. Segment Information

The company has three reportable operating segments: potash, nitrogen and phosphate. These segments are differentiated by the chemical nutrient contained in the products that each produces. The accounting policies of the segments are the same as those described in Note 1 and are measured in a manner consistent with that of the financial statements. Inter-segment sales are made under terms that approximate market value. The company's operating segments have been determined based on reports reviewed by the Chief Executive Officer, assessed to be the company's chief operating decision-maker, that are used to make strategic decisions.

	Three Months Ended June 30, 2015				
	Potash	Nitrogen	Phosphate	All Others	Consolidated

⁽¹⁾ Inter-segment net sales were \$58.

3. Income Taxes

A separate estimated average annual effective tax rate was determined for each taxing jurisdiction and applied individually to the interim period pre-tax income of each jurisdiction.

	Three Months Ended June 30		Six Months Ended June 30	
	2015	2014	2015	2014
Income tax expense	\$ 152	\$ 166	\$ 292	\$ 310
Actual effective tax rate on ordinary earnings	26%	27%	27%	27%
Actual effective tax rate including discrete items	27%	26%	27%	28%
Discrete tax adjustments that impacted the tax rate	\$ 3	\$ (6)	\$ 6	\$ (4)

In the first quarter of 2014, a \$38 discrete non-tax deductible impairment of an available-for-sale investment was recorded. This increased the actual effective tax rate including discrete items for the six months ended June 30, 2014 by 1 percentage point.

Income tax balances within the condensed consolidated statements of financial position were comprised of the following:

Income Tax Assets (Liabilities)	Statements of Financial Position Location	June 30, 2015	December 31, 2014
Current income tax assets			
Current	Receivables	\$ 71	\$ 145
Non-current	Other assets	76	83
Deferred income tax assets	Other assets	11	10
Total income tax assets		\$ 158	\$ 238
Current income tax liabilities			
Current	Payables and accrued charges	\$ (64)	\$ (5)
Non-current	Other non-current liabilities and deferred credits	(113)	(109)
Deferred income tax liabilities	Deferred income tax liabilities	(2,284)	(2,201)
Total income tax liabilities		\$(2,461)	\$ (2,315)

Finished products	\$ 286	\$ 267
Intermediate products	115	85
Raw materials	87	78
Materials and supplies	221	216
	\$ 709	\$ 646

6. Long-Term Debt

On March 26, 2015, the company closed the issuance of \$500 of 3.00 percent senior notes due April 1, 2025. The senior notes were issued under a US shelf registration statement.

7. Share Capital

Authorized

The company is authorized to issue an unlimited number of common shares without par value and an unlimited number of first preferred shares. The common shares are not redeemable or convertible. The first preferred shares may be issued in one or more series with rights and conditions to be determined by the Board of Directors. No first preferred shares have been issued.

Issued

	Number of Common Shares	Consideration
Balance — December 31, 2014	830,242,574	\$1,632
Issued under option plans	3,745,610	56
Issued for dividend reinvestment plan	660,616	24
Balance — June 30, 2015	834,648,800	\$1,712

Dividends Declared

The company declared dividends per share of \$0.38 (2014 — \$0.35) during the three months ended June 30, 2015 and \$0.76 (2014 — \$0.70) during the six months ended June 30, 2015.

8. Share-Based Compensation

On May 12, 2015, the company's shareholders approved the 2015 Performance Option Plan under which the company may, after February 20, 2015 and before January 1, 2016, grant options to acquire up to 3,500,000 common shares. Under the plan, the exercise price shall not be less than the quoted market closing price of the company's common shares on the last trading day immediately preceding the date of the grant, and an option's maximum term is 10 years. In general, options will vest, if at all, according to a schedule based on the three-year average excess of the company's consolidated cash flow return on investment over weighted average cost of capital. As of June 30, 2015, options to purchase a total of 3,474,900 common shares had been granted under the plan. The weighted average fair value of options granted was \$5.48 per share, estimated as of the date of grant using the Black-Scholes-Merton option-pricing model with the following weighted average assumptions:

Exercise price per option	\$ 32.41
Expected annual dividend per share	\$ 1.52
Expected volatility	31%
Risk-free rate of return	1.54%
Expected life of options	5.5 years

9. Financial Instruments

Fair Value

Estimated fair values for financial instruments are designed to approximate amounts at which the instruments could be exchanged in a current arm's-length transaction between knowledgeable willing parties. The valuation policies and procedures for financial reporting purposes are determined by the company's finance department.

Financial instruments included in the consolidated statements of financial position are measured either at fair value or amortized cost. The tables below explain the valuation methods used to determine the fair value of each financial instrument and its associated level in the fair value hierarchy.

Financial Instruments Measured at Fair Value	Fair Value Method
Cash and cash equivalents	Approximated carrying value.
Investments in Israel Chemicals Ltd. ("ICL") and Sinofert Holdings Limited ("Sinofert") designated as available-for-sale	Based on the closing bid price of the common shares (Level 1) as at the statements of financial position dates.
Foreign currency derivatives not traded in an active market	Determined using quoted forward exchange rates (Level 2) as at the statements of financial position dates.
Natural gas swaps not traded in an active market	Based on a discounted cash flow model. The inputs used in the model included contractual cash flows based on prices for natural gas futures contracts, fixed prices and notional volumes specified by the swap contracts, the time value of money, liquidity risk, the company's own credit risk (related to instruments in a liability position) and counterparty credit risk (related to instruments in an asset position). Certain of the futures contract prices used as inputs in the model were supported by prices quoted in an active market (Level 2) and others were not based on observable market data (Level 3). For valuations that included both observable and unobservable data, if the unobservable input was determined to be significant to the overall inputs, the entire valuation was categorized in Level 3.
Natural gas futures	Based on closing prices provided by the exchange (NYMEX) (Level 1) as at the statements of financial position dates.

For natural gas swaps, the primary input into the valuation model was natural gas futures prices, which were based on delivery at the Henry Hub and were observable only for up to three years in the future. The unobservable futures price range as at June 30, 2015 was \$3.34 to \$4.08 per MMBtu (December 31, 2014 – \$3.82 to \$4.74 per MMBtu). A 10 percent increase in the unobservable natural gas futures prices that are not counterbalanced by offsetting derivative positions would result in an \$8 (December 31, 2014 – \$3) decrease in the fair value of the liability. A 10 percent decrease in the unobservable natural gas futures prices that are not counterbalanced by offsetting derivative positions would result in an \$8 (December 31, 2014 – \$3) increase in the fair value of the liability. Interest rates used to discount estimated cash flows as at June 30, 2015 were between 0.19 percent and 3.47 percent (December 31, 2014 – between 0.17 percent and 3.48 percent) depending on the settlement date.

Financial Instruments Measured at Amortized Cost
Fair Value Method

Receivables, short-term debt and payables and accrued charges	Assumed to approximate carrying value due to their short-term nature.
Long-term debt senior notes	Quoted market prices (Level 1 or 2 depending on the market liquidity of the debt).
Other long-term debt instruments	Assumed to approximate carrying value.

Presented below is a comparison of the fair value of the company's senior notes to their carrying values.

	June 30, 2015		December 31, 2014	
	Carrying Amount of Liability	Fair Value of Liability	Carrying Amount of Liability	Fair Value of Liability
Long-term debt senior notes	\$ 4,250	\$ 4,482	\$ 3,750	\$ 4,182

The following table presents the company's fair value hierarchy for financial assets and financial liabilities carried at fair value on a recurring basis.

	Fair Value Measurements as at Reporting Dates Using:			
	Carrying Amount of Asset (Liability)	Quoted Prices in Active Markets for Identical Assets (Level 1) ⁽¹⁾	Significant Other Observable Inputs (Level 2) ^(1,2)	Significant Unobservable Inputs (Level 3) ⁽²⁾
June 30, 2015				
Derivative instrument assets				
Natural gas derivatives	\$ 10	\$ —	\$ 2	\$ 8
Investments in ICL and Sinofert	1,586	1,586	—	—
Derivative instrument liabilities				
Natural gas derivatives	(188)	—	(110)	(78)
Foreign currency derivatives	(1)	—	(1)	—
December 31, 2014				
Derivative instrument assets				
Natural gas derivatives	\$ 7	\$ —	\$ (13)	\$ 20
Investments in ICL and Sinofert	1,527	1,527	—	—
Derivative instrument liabilities				
Natural gas derivatives	(193)	(4)	(58)	(131)
Foreign currency derivatives	(2)	—	(2)	—

⁽¹⁾ During the six months ended June 30, 2015 and twelve months ended December 31, 2014, there were no transfers between Level 1 and Level 2.

⁽²⁾ During the six months ended June 30, 2015, there were no transfers into Level 3 and \$43 of losses was transferred out of Level 3 into Level 2 as (due to the passage of time) the terms of certain natural gas derivatives now matured in their entirety within 36 months. During the twelve months ended December 31, 2014, there were no transfers into Level 3 and \$50 of losses was transferred out of Level 3 into Level 2 as (due to the passage of time) the terms of certain natural gas derivatives now matured in their entirety within 36 months. The company's policy is to recognize transfers at the end of the reporting period.

The following table presents a reconciliation of the beginning and ending balances of the company's fair value measurements using significant unobservable inputs (Level 3):

	Natural Gas Derivatives	
	Six Months Ended June 30, 2015	Twelve Months Ended December 31, 2014
Balance, beginning of period	\$ (111)	\$ (141)
Total (losses) gains, realized and unrealized, before income taxes		
Included in net income, within cost of goods sold	(11)	(19)
Included in other comprehensive income	(6)	(30)
Purchases	—	—
Sales	—	—
Issues	—	—
Settlements	15	29
Transfers of losses out of Level 3	43	50
Balance, end of period	\$ (70)	\$ (111)
Losses for the period included in net income, within cost of goods sold, were:		
Change in unrealized losses relating to instruments still held at the reporting date	\$ —	\$ (1)
Total losses, realized and unrealized	(11)	(19)

10. Seasonality

The company's sales of fertilizer can be seasonal. Fertilizers are sold primarily for spring and fall application in both Northern and Southern Hemispheres. Typically, fertilizer sales are highest in the second quarter of the year, due to the North American spring planting season. However, planting conditions and the timing of customer purchases will vary each year and fertilizer sales can be expected to shift from one quarter to another. Feed and industrial sales are more evenly distributed throughout the year.

11. Contingencies and Other Matters

Canpotex

PCS is a shareholder in Canpotex Limited ("Canpotex"), a potash export, sales and marketing company owned in equal shares by the three potash producers in Saskatchewan, which markets Saskatchewan potash offshore. Should any operating losses or other liabilities be incurred by Canpotex, the shareholders have contractually agreed to reimburse it for such losses or liabilities in proportion to each shareholder's productive capacity. Through June 30, 2015, there were no such operating losses or other liabilities.

Mining Risk

The risk of underground water inflows, as with other underground risks, is currently not insured.

Legal and Other Matters

The company is engaged in ongoing site assessment and/or remediation activities at a number of facilities and sites, and anticipated costs associated with these matters are added to accrued environmental costs in the manner previously described in Note 22 to the company's 2014 annual consolidated financial statements. This includes matters related to investigation of potential brine migration at certain of the potash sites. The following environmental site assessment and/or remediation matters have uncertainties that may not be fully reflected in the amounts accrued for those matters:

Nitrogen and phosphate

- The US Environmental Protection Agency ("USEPA") has identified PCS Nitrogen, Inc. ("PCS Nitrogen") as a potentially responsible party at the Planters Property or Columbia Nitrogen site in Charleston, South Carolina. PCS Nitrogen is subject to a final judgment by the US District Court for the District of South Carolina allocating 30 percent of the liability for response costs at the site to PCS Nitrogen, as well as a proportional share of any costs that cannot be recovered from another responsible party. In December 2013, the USEPA issued an order to PCS Nitrogen and four other respondents requiring them jointly and severally to conduct certain cleanup work at the site and reimburse the USEPA's costs for overseeing that work. PCS Nitrogen is currently performing the work required by the USEPA order. The USEPA also has requested reimbursement of \$4 of previously incurred response costs. The ultimate amount of liability for PCS Nitrogen depends upon the final outcome of litigation to impose liability on additional parties, the amount needed for remedial activities, the ability of other parties to pay and the availability of insurance.
- PCS Phosphate Company, Inc ("PCS Phosphate") has agreed to participate, on a non-joint and several basis, with parties to an Administrative Settlement Agreement with the USEPA ("Settling Parties") in a removal action and the payment of certain other costs associated with PCB soil contamination at the Ward Transformer Superfund Site in Raleigh, North Carolina ("Site"), including reimbursement of past USEPA costs. The removal activities commenced in August 2007 and are believed to be nearly complete. In September 2013, PCS Phosphate and other parties entered into an Administrative Order on Consent with the USEPA, pursuant to which a supplemental remedial investigation and focused feasibility study will be performed on the portion of the Site that was subject to the removal action. The completed and anticipated work on the Site is estimated to cost a total of \$80. PCS Phosphate is a party to ongoing Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") contribution and cost recovery litigation for the recovery of costs of the removal activities. The USEPA

has also issued an order to a number of entities requiring remediation downstream of the area subject to the removal action ("Operable Unit 1"). PCS Phosphate did not receive this order. At this time, the company is unable to evaluate the extent of any exposure that it may have for the matters addressed in the CERCLA litigation or for Operable Unit 1.

- In 1996, PCS Nitrogen Fertilizer, L.P. ("PCS Nitrogen Fertilizer"), then known as Arcadian Fertilizer, L.P., entered into a Consent Order (the "Order") with the Georgia Environmental Protection Division ("GEPD") in conjunction with PCS Nitrogen Fertilizer's acquisition of real property in Augusta, Georgia. Under the Order, PCS Nitrogen Fertilizer is required to perform certain activities to investigate and, if necessary, implement corrective measures for substances in soil and groundwater. The investigation has proceeded and the results have been presented to GEPD. Two interim corrective measures for substances in groundwater have been proposed by PCS Nitrogen Fertilizer and approved by GEPD. PCS Nitrogen Fertilizer is implementing the approved interim corrective measures, which may be modified by PCS Nitrogen Fertilizer from time to time, but it is unable to estimate with reasonable certainty the total cost of its corrective action obligations under the Order at this time.

Based on current information and except for the uncertainties described in the preceding paragraphs, the company does not believe that its future obligations with respect to these facilities and sites are reasonably likely to have a material adverse effect on its consolidated financial statements.

Other legal matters with significant uncertainties include the following:

Nitrogen and phosphate

- The USEPA has an ongoing initiative to evaluate implementation within the phosphate industry of a particular exemption for mineral processing wastes under the hazardous waste program. In connection with this industry-wide initiative, the USEPA conducted inspections at numerous phosphate operations and notified the company of alleged violations of the US Resource Conservation and Recovery Act ("RCRA") at its plants in Aurora, North Carolina; Geismar, Louisiana; and White Springs, Florida; and one alleged Clean Air Act ("CAA") violation at its Geismar, Louisiana plant. The company has entered into RCRA 3013 Administrative Orders on Consent and has performed certain site assessment activities at all of these plants. At this time, the company does not know the scope of action, if any, that may be required. As to the alleged RCRA violations, the company continues to participate in settlement discussions with the USEPA but is uncertain if any resolution will be possible without litigation, or, if litigation occurs, what the outcome would be.
- The USEPA has pursued an initiative to evaluate compliance with the CAA at sulfuric acid and nitric acid plants. In connection with this industry-wide initiative, the company, without admitting liability, reached a global settlement with the USEPA in September 2014, which covers the sulfuric acid plants at the Aurora, North Carolina; Geismar, Louisiana; and White Springs, Florida facilities. The consent decree to implement the settlement became effective on February 26, 2015. The total

estimated costs for complying with the consent decree are expected to be at least \$51 over a compliance period that extends into 2020.

General

- The scope or timing of any final, effective requirements to control the company's greenhouse gas emissions in the US or Canada is uncertain. Canada has withdrawn from participation in the Kyoto Protocol, and the Canadian government has announced its intention to coordinate greenhouse gas policies with the US. Although the US Congress has not passed any greenhouse gas emission control laws, the USEPA has adopted several rules to control such emissions using authority under existing environmental laws. Some Canadian provinces and US states are considering the adoption of greenhouse gas emission control requirements. In Saskatchewan, provincial regulations pursuant to the Management and Reduction of Greenhouse Gases Act, which impose a type of carbon tax to achieve a goal of a 20 percent reduction in greenhouse gas emissions by 2020, compared to 2006 levels, may become effective in 2015. None of these regulations has resulted in material limitations on greenhouse gas emissions at the company's facilities. The company is monitoring these developments and their future effect on its operations cannot be determined with certainty at this time.

In addition, various other claims and lawsuits are pending against the company in the ordinary course of business. While it is not possible to determine the ultimate outcome of such actions at this time, and inherent uncertainties exist in predicting such outcomes, it is the company's belief that the ultimate resolution of such actions is not reasonably likely to have a material adverse effect on its consolidated financial statements.

The breadth of the company's operations and the global complexity of tax regulations require assessments of uncertainties and judgments in estimating the taxes it will ultimately pay. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions, outcomes of tax litigation and resolution of disputes arising from federal, provincial, state and local tax audits. The resolution of these uncertainties and the associated final taxes may result in adjustments to the company's tax assets and tax liabilities.

The company owns facilities that have been either permanently or indefinitely shut down. It expects to incur nominal annual expenditures for site security and other maintenance costs at certain of these facilities. Should the facilities be dismantled, certain other shutdown-related costs may be incurred. Such costs are not expected to have a material adverse effect on the company's consolidated financial position or results of operations and would be recognized and recorded in the period in which they are incurred.

12. Related Party Transactions

The company sells potash from its Saskatchewan mines for use outside Canada and the US exclusively to Canpotex. Sales are at prevailing market prices and are settled on normal trade terms. Sales to Canpotex for the three months ended June 30, 2015 were \$413 (2014 – \$342) and the six months ended June 30, 2015 were \$768 (2014 – \$591). At June 30, 2015, \$170 (December 31, 2014 – \$216) was owing from Canpotex.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis is the responsibility of management and is as of August 5, 2015. The Board of Directors carries out its responsibility for review of this disclosure principally through its audit committee, comprised exclusively of independent directors. The audit committee reviews and, prior to its publication, approves this disclosure, pursuant to the authority delegated to it by the Board of Directors. The term “PCS” refers to Potash Corporation of Saskatchewan Inc. and the terms “we,” “us,” “our,” “PotashCorp” and “the company” refer to PCS and, as applicable, PCS and its direct and indirect subsidiaries as a group. Additional information relating to PotashCorp (which, except as otherwise noted, is not incorporated by reference herein), including our Annual Report on Form 10-K for the year ended December 31, 2014 (2014 Form 10-K), can be found on SEDAR at www.sedar.com and on EDGAR at www.sec.gov. The company is a foreign private issuer under the rules and regulations of the US Securities and Exchange Commission (the SEC); however, it currently files voluntarily on the SEC’s domestic forms.

PotashCorp and Our Business Environment

PotashCorp is an integrated producer of fertilizer, industrial and animal feed products. We are the world’s largest fertilizer company by capacity, producing the three primary crop nutrients: potash (K), nitrogen (N) and phosphate (P). As the world’s largest potash producer by capacity, we are responsible for nearly one-fifth of global capacity through our Canadian operations. To enhance our global footprint, we have investments in four potash-related businesses in South America, the Middle East and Asia. We complement our potash assets with focused positions in nitrogen and phosphate.

A detailed description of our markets and customers can be found on pages 45 and 46 (potash), 55 and 56 (nitrogen) and 63 and 64 (phosphate) in our 2014 Annual Integrated Report (2014 AIR).

How We Create Value

Our Value Model, depicted below and outlined in further detail on pages 16 and 17 in our 2014 AIR, informs the goals and strategies we put in place to create value for all stakeholders.

We believe strong financial performance is the cornerstone of PotashCorp’s value creation. It rewards our shareholders while allowing us to fulfill our broader social and environmental responsibilities. Our business strategies, depicted below and described in further detail on pages 18 and 19 in our 2014 AIR, did not change during the second quarter of 2015.

How We Approach Risk

In our 2014 AIR, we provide an overview of our approach to risk (page 21), explain how we use a risk management ranking methodology to assess the key risks specific to our company (page 22) and describe each key risk and our risk management approach (pages 23 to 25). Our business is subject to constant and significant change that can result in changes to our key risks.

No additional key risks were identified or removed during the second quarter and first half of 2015 compared to those outlined in our 2014 AIR. The following tables outline our risk ranking matrix and continuing key risks as of December 31, 2014 and June 30, 2015.

Risk Ranking Matrix ¹		Severity of Consequence				
		Negligible	Low	Medium	Major	Extreme
Likelihood	Probable	C	B	B	A	A
	High	D	C	B	B	A
	Medium	D	D	C	B	B
	Low	E	D	D	C	B
	Remote	E	E	D	D	C

¹ Refer to page 22 in our 2014 AIR for further detail

Key Risks	Residual Risk Level Jun 30/15	Residual Risk Level Dec 31/14	Status	Link to Business Strategies ¹	Key Risks	Residual Risk Level Jun 30/15	Residual Risk Level Dec 31/14	Status	Link to Business Strategies ¹
Global potash demand	B	B	↔ M		Product transportation mishaps	C	C	↔	
Competitive potash supply	B	B	↔ M		Sustaining growth opportunities	C	C	↔	
Offshore potash sales and distribution	B	B	↔		Transportation and distribution infrastructure	C	C	↔ M	
Potash operating capability	C	C	↔ M		Trinidad natural gas supply	C	C	↔ M	
Safety, health, environmental and security	C	C	↔ M		Cyber security	C	C	↔ M	
International operations	C	C	↔ ² M		<p>↔ No change to risk</p> <p>▲ Increased risk</p> <p>▼ Decreased risk</p> <p>M Risk has materialized in part in the current or previous periods</p>				

¹ Darker sections of the triangle indicate the specific strategy (described in the triangle on page 14 of this 10-Q) impacted by the described risk in the table above. Faded sections of the triangle mean the specific strategy is not significantly impacted by the described risk.

² While the relative residual ranking of this risk has not changed since December 31, 2014, consistent with the first quarter of 2015 we believe the risk level is trending higher due to external factors affecting the business and operating environment in the foreign jurisdictions in which we have equity investments. This risk is further described on page 20 of our 2014 Form 10-K.

Key Performance Drivers – Performance Compared to Targets

Through our integrated value model, we set, evaluate and refine our goals and priorities to drive improvements that benefit all those impacted by our business. We demonstrate our accountability by tracking and reporting our progress against targets related to each goal. Our long-term goals and 2015 targets are set out on pages 36 to 41 of our 2014 AIR. A summary of our progress towards selected goals and representative annual targets is set out below.

Goal	Representative 2015 Annual Target	Performance to June 30, 2015
Create superior long-term shareholder value.	Exceed total shareholder return performance for our sector and the DAXglobal Agribusiness Index.	PotashCorp's total shareholder return was -10 percent in the first six months of 2015 compared to our sector's weighted average return (based on market capitalization) of 12 percent and the DAXglobal Agribusiness Index weighted average return (based on market capitalization) of 2 percent.
Attract, retain, develop and engage employees to achieve our long-term goals.	Fill 75 percent of senior staff openings with qualified internal candidates.	The percentage of senior staff positions filled internally in the first six months of 2015 was 78 percent.
Achieve no harm to people.	Achieve zero life-altering injuries at our sites. Reduce total site recordable injury rate to 0.95 (or lower) and total lost-time injury rate to 0.10 (or lower).	Sadly, a workplace accident resulted in the loss of an employee at our White Springs phosphate operation during the first quarter of 2015. During the first six months of 2015, total site recordable injury rate was 0.88 and total lost-time injury rate was 0.07.
Achieve no damage to the environment.	By 2018, reduce total reportable incidents (releases, permit excursions and spills) by 40 percent from 2014 levels.	Annualized total reportable incidents were down 17 percent during the first six months of 2015 compared to 2014 annual levels. Compared to the first six months of 2014, total reportable incidents were down 9 percent.

Performance Overview

This discussion and analysis are based on the company's unaudited interim condensed consolidated financial statements included in Item 1 of this Quarterly Report on Form 10-Q (financial statements in this Form 10-Q) based on International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS), unless otherwise stated. All references to per-share amounts pertain to diluted net income per share.

For an understanding of trends, events, uncertainties and the effect of critical accounting estimates on our results and financial condition, this Form 10-Q should be read carefully, together with our 2014 AIR.

Earnings Guidance – Second Quarter 2015

	Company Guidance	Actual Results
Earnings per share	\$0.45 – \$0.55	\$0.50

Overview of Actual Results

Dollars (millions), except per-share amounts	Three Months Ended June 30				Six Months Ended June 30			
	2015	2014	Change	% Change	2015	2014	Change	% Change
Sales	\$ 1,731	\$ 1,892	\$ (161)	(9)	\$ 3,396	\$ 3,572	\$ (176)	(5)
Gross margin	711	747	(36)	(5)	1,378	1,312	66	5
Operating income	619	686	(67)	(10)	1,178	1,217	(39)	(3)
Net income	417	472	(55)	(12)	787	812	(25)	(3)
Net income per share – diluted	0.50	0.56	(0.06)	(11)	0.94	0.95	(0.01)	(1)
Other comprehensive income (loss)	37	(6)	43	n/m	60	51	9	18

n/m = not meaningful

Earnings in the second quarter of 2015 were lower than the same period in 2014 as higher gross margins in potash and phosphate were more than offset by lower gross margin in nitrogen. Earnings were negatively impacted further by increased provincial mining and other taxes.

Year over year earnings were lower than the same period in 2014. Higher potash and phosphate gross margins were more than offset by lower nitrogen gross margin, increased provincial mining and other taxes, and lower dividend income from our investment in Israel Chemicals Ltd. (ICL) in 2015 (a special dividend was received in 2014).

Global potash shipments remained strong during the second quarter of 2015, especially to China and India where higher contract volumes supported robust shipments for most producers. Demand in other offshore markets remained at historically high levels, although the impacts of weaker crop economics, currency volatility and credit availability slowed purchases from 2014's record pace – most notably in Brazil. In North America, a shortened planting season and greater availability of product from offshore suppliers kept domestic producer sales below 2014's exceptionally strong comparative period.

In nitrogen, prices for most products declined from those realized in second-quarter 2014 as market fundamentals weakened on increased global supply and record Chinese urea exports over the past 12 months. As the quarter progressed, urea prices found support on stronger demand in key import markets and slowing exports from China, while ammonia markets stabilized due to supply constraints in major exporting regions.

In phosphate, solid phosphate fertilizer prices were generally consistent with those in the second quarter of 2014 as improved Indian demand more than offset weakness in Latin America and record Chinese exports. Robust demand for other phosphate products – most notably liquid fertilizers in India and North America – supported improved prices relative to 2014's second quarter.

Other comprehensive income for the second quarter and first half of 2015 mainly resulted from an increase in the fair value of our investment in Sinofert Holdings Limited (Sinofert), partially offset by a decrease in the fair value of our investment in ICL. Other comprehensive loss for the second quarter of 2014 mainly resulted from a decrease in the fair value of our investment in ICL. For the first half of 2014, other comprehensive income mainly resulted from an increase in the fair value of our investment in ICL.

Operating Segment Review

We report our results (including gross margin) in three business segments: potash, nitrogen and phosphate as described in Note 2 to the financial statements in this Form 10-Q. Our reporting structure reflects how we manage our business and how we classify our operations for planning and measuring performance. We include net sales in segment disclosures in the financial statements in this Form 10-Q pursuant to IFRS, which require segmentation based upon our internal organization and reporting of revenue and profit measures. As a component of gross margin, net sales (and the related per-tonne amounts) are the primary revenue measures we use and review in making decisions about operating matters on a business segment basis. These decisions include assessments about potash, nitrogen and phosphate performance and the resources to be allocated to these segments. We also use net sales (and the related per-tonne amounts) for business planning and monthly forecasting. Net sales are calculated as sales revenues less freight, transportation and distribution expenses. Realized prices refer to net sales prices.

Our discussion of segment operating performance is set out below and includes nutrient product and/or market performance results, where applicable, to give further insight into these results.

Potash Performance

Financial Performance

⁽¹⁾ Canpotex Limited (Canpotex).

⁽²⁾ All Asian countries except China and India.

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin):

	Quarter over Quarter	Year over Year
Net Sales Prices	↑ Our average realized price improvement in 2015 reflected higher prices in most markets compared to last year's second quarter when realizations were still recovering from the lows experienced in early 2014.	↑ Realized prices in 2015 benefitted from a recovery throughout 2014 driven by higher consumption.
Sales Volumes	<p>↓ North American sales volumes declined from the exceptionally strong comparative period in 2014.</p> <p>↑ Offshore volumes increased as Canpotex shipments reached record levels in 2015 due to improved rail logistics and enhanced infrastructure and distribution capabilities.</p>	<p>↓ North American sales volumes declined due to lower fertilizer demand and higher offshore imports.</p> <p>↑ Shipments to offshore markets rose due to strong demand in 2015 and improved rail logistics and enhanced infrastructure and distribution capabilities. Further, rail constraints in 2014 did not recur in 2015.</p>
Cost of Goods Sold	<p>↓ More product from our higher-cost mines went to offshore customers resulting in a negative cost of goods sold variance.</p> <p>↑ The Canadian dollar weakened relative to the US dollar, reducing cost of goods sold.</p>	↑ The Canadian dollar weakened relative to the US dollar, reducing cost of goods sold.

Year over year the change in market mix produced a favorable variance of \$42 million related to sales volumes and an unfavorable variance of \$42 million in sales prices due to more lower-priced standard product being sold to the offshore market and less higher-priced granular sales to North America in 2015.

Non-Financial Performance

		Three Months Ended June 30			Six Months Ended June 30		
		2015	2014	% Change	2015	2014	% Change
Production	KCl tonnes produced (thousands)	2,387	2,321	3	4,999	4,716	6
Safety	Life-altering injuries	—	—	—	—	1	(100)
	Total site recordable injury rate	1.73	2.09	(17)	1.57	1.71	(8)
	Total lost-time injury rate	0.10	0.12	(17)	0.15	0.17	(12)
Employee	Percentage of senior staff positions filled internally	50%	100%	(50)	67%	100%	(33)
Environmental	Environmental incidents	1	5	(80)	2	9	(78)
	Waste (million tonnes)	5.3	4.9	8	10.6	9.4	13

The most significant contributors to the changes in non-financial results were as follows:

	Quarter over Quarter	Year over Year
Employee	In the second quarter of 2015, one of two senior staff positions was filled internally while all three available senior staff positions were filled internally in the same period in 2014.	In the first half of 2015, two of three senior staff positions were filled internally while all six available senior staff positions were filled internally in the same period in 2014.
Environmental	In the second quarter of 2015, we had one environmental incident related to brine overflow, which resulted in a brine spill. Environmental incidents for the second quarter of 2014 mainly included brine and slurry pipe failures resulting in brine spills.	In the first half of 2015, environmental incidents included a minor propane gas release and brine spill. In the first half of 2014, environmental incidents mainly included brine and slurry pipeline failures resulting in brine spills.

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin, while the • symbol signifies a neutral impact):

	Quarter over Quarter	Year over Year
Net Sales Prices	<p>↓ Increased supply in key producing regions pressured benchmark prices and realizations for all our products.</p>	<p>↓ Nitrogen prices weakened during the first half of 2015 on reduced demand in key markets and increased supply, including record Chinese urea exports. This was partially offset by elevated North American ammonia prices due to supply challenges in key exporting regions in the first quarter of 2015.</p>
Sales Volumes	<p>↑ There were no significant changes.</p>	<p>↓ Sales volumes in 2015 were affected by weaker fertilizer demand, issues related to product availability caused by mechanical challenges at our Lima facility and curtailments in Trinidad related to natural gas supply.</p>
Cost of Goods Sold	<p>↑ Average costs, including our hedge position, for natural gas used as feedstock in production decreased 21 percent. Costs for natural gas used as feedstock in Trinidad production fell 18 percent (contract price indexed, in part, to Tampa ammonia prices) while our US spot costs for natural gas decreased 41 percent. Including losses on our hedge position, US gas prices fell 23 percent.</p> <p>↓ Costs were impacted by higher losses on natural gas hedging derivatives included in cost of goods sold.</p>	<p>↓ Costs were impacted by higher losses on natural gas hedging derivatives included in cost of goods sold.</p> <p>↑ Average costs, including our hedge position, for natural gas used as feedstock in production decreased 13 percent. Costs for natural gas used as feedstock in Trinidad production fell 5 percent (contract price indexed, in part, to Tampa ammonia prices) while our US spot costs for natural gas decreased 40 percent. Including losses on our hedge position, US gas prices fell 22 percent.</p> <p>• Lower natural gas costs in the US were offset by a rise in Trinidad natural gas costs in the first quarter of 2015.</p>

*In production, including hedge

Non-Financial Performance

		Three Months Ended June 30			Six Months Ended June 30		
		2015	2014	% Change	2015	2014	% Change
Production	N tonnes produced (thousands)	753	830	(9)	1,545	1,663	(7)
Safety	Total site recordable injury rate	0.19	0.28	(32)	0.17	0.38	(55)

	Environmental incidents	1	—	n/m	3	1	200

n/a = not applicable as there were no senior staff positions available to be filled during the period

n/m = not meaningful

The most significant contributors to the changes in non-financial results were as follows:

	Quarter over Quarter	Year over Year
Safety	The total site recordable injury rate decreased from 2014 due to more hours being worked in 2015 as the number of recordable injuries was unchanged.	There were three recordable injuries in 2015 compared to five in 2014. Combined with more hours worked in 2015, the total site recordable injury rate declined. There were no lost-time injuries in 2015 compared to one in 2014.
Employee	There were no senior staff positions available to be filled in 2015.	In 2015, the one available senior staff position was not filled internally while all three available senior staff positions were filled internally in 2014.

Other miscellaneous and purchased product				(2)				(2)
Total				\$24				\$56

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin):

	Quarter over Quarter	Year over Year
Net Sales Prices	↑ Our average realized price was above the same periods in 2014 mainly as a result of improved market fundamentals, due to strong demand and supply outages for certain key phosphate export regions.	
Sales Volumes	↓ Absence of production from our Suwannee River chemical plant, due to its closure in 2014, reduced tonnes available for sale in 2015.	↓ Sales volumes were down due to a reduction in capacity caused by a turnaround at our Aurora facility in the second quarter of 2015 and the closure of Suwannee River in 2014. In addition a greater proportion of our phosphoric acid was directed to products with higher phosphate content.
Cost of Goods Sold	↑ Depreciation was lower due to accelerated depreciation in the second quarter of 2014 related to fertilizer resulting from operations changes announced in late 2013. ↑ Favorable adjustments to our asset retirement obligations occurred in 2015 while unfavorable adjustments occurred in 2014 as a result of changes in the relevant discount rates. ↓ Costs rose due to increased reliability maintenance costs at Aurora and costs associated with our cooling ponds. ↓ Sulfur costs were up 12 percent quarter over quarter and 17 percent year over year, increasing our cost of goods sold.	

Non-Financial Performance

n/m = not meaningful

The most significant contributors to the changes in non-financial results were as follows:

	Quarter over Quarter	Year over Year
Safety	There were five recordable injuries in 2015 compared to nine in 2014. Combined with more hours worked in 2015, the total site recordable injury rate declined. There were no lost-time injuries in 2015 compared to one in 2014.	Sadly, a workplace accident resulted in the loss of an employee at our White Springs phosphate operation during the first quarter of 2015. There were 13 recordable injuries and one lost-time injury in 2015 compared to 17 recordable injuries and two lost-time injuries in 2014. Combined with more hours worked in 2015, the total site recordable injury rate declined.
Employee	In 2015, the one available senior staff position was filled internally while four of five senior staff positions were filled internally in 2014.	In 2015, one of two senior staff positions were filled internally while 10 of 11 senior staff positions were filled internally in 2014.
Environmental	Environmental incidents in the second quarter and first half of 2015 were related to releases of solids and phosphorus in waste water and a phosphoric acid release.	

Other Expenses and Income

Income taxes	(152)	(166)	14	(8)	(292)	(310)	18	(6)

n/m = not meaningful

The most significant contributors to the change in other expenses and income were as follows:

	Quarter over Quarter	Year over Year																									
Provincial Mining and Other Taxes	Provincial mining and other taxes increased quarter over quarter due to higher potash production tax in 2015 resulting from a weaker Canadian dollar and stronger potash prices. In addition, deductible costs decreased due to the first-quarter 2015 changes to potash taxation in the Province of Saskatchewan which deferred the timing of the annual allowable deduction for capital expenditures. This was partially offset by a lower proportion of forecasted annual gross margin earned in the second quarter of 2015 as compared to the same period in 2014.	Provincial mining and other taxes increased due to higher potash production tax in 2015 resulting from a weaker Canadian dollar and stronger potash prices. In addition, deductible costs decreased due to the first-quarter 2015 changes to potash taxation in the Province of Saskatchewan which deferred the timing of the annual allowable deduction for capital expenditures.																									
Dividend Income	Dividend income from ICL increased slightly.	Dividend income was down due to the company receiving a special dividend of \$69 million from ICL in the first quarter of 2014. No special dividends were received in 2015.																									
Impairment of Available-for-Sale Investment	No impairment losses were recognized in the second quarter of 2015 or 2014.	A non-tax deductible impairment loss of \$38 million was recorded in net income on our investment in Sinofert during the first quarter of 2014. No such losses were recognized in 2015.

Other Non-Financial Information

	Three Months Ended June 30				Six Months Ended June 30			
Dollars (millions), except percentage amounts	2015	2014	Change	% Change	2015	2014	Change	% Change
Taxes and royalties expense ⁽¹⁾	215	199	16	8	457	369	88	24

⁽¹⁾ Includes tax and royalty amounts on an accrual basis calculated as: current income tax expense less investment tax credits and realized excess tax benefit related to share-based compensation plus potash production tax, resource surcharge, royalties, municipal taxes and other miscellaneous taxes.

The most significant contributors to the change in other non-financial information were as follows:

	Quarter over Quarter	Year over Year
Taxes and Royalties	Taxes and royalties increased primarily due to the increases in provincial mining and other taxes described above.	Taxes and royalties increased mainly due to increases in provincial mining and other taxes (described above) and current income taxes. The increase in current income taxes was primarily due to higher current income taxes in Canada as a result of increased potash earnings in 2015 compared to the same period in 2014.

Financial Condition Review

Statement of Financial Position Analysis

The most significant contributors to the changes in our statements of financial position were as follows (direction of arrows refers to increase or decrease):

Assets

- ↑ Refer to the Condensed Consolidated Statements of Cash Flow in this Form 10-Q for details on the increase in cash and cash equivalents.
- ↓ Receivables decreased mainly due to lower trade accounts receivable and lower income taxes receivable. Income taxes receivable decreased due to income taxes accrued during the first half of 2015 being applied against the income tax receivable at December 31, 2014. In addition, income tax refunds accrued at December 31, 2014 were received in second-quarter 2015.
- ↑ Property, plant and equipment increased largely as a result of our previously announced potash and nitrogen capacity expansions.

Liabilities

- ↓ Short-term debt and current portion of long-term debt declined due to a decrease in our outstanding commercial paper.
- ↑ Long-term debt was higher as a result of the issuance of \$500 million in senior notes in the first quarter of 2015.

Equity

- ↑ Equity was mainly impacted by net income (discussed in more detail in the overview of actual results above) and dividends declared.

As at June 30, 2015, \$160 million (December 31, 2014 – \$127 million) of our cash and cash equivalents was held in certain foreign subsidiaries. In July 2015, \$118 million of those funds was repatriated with no tax consequences. There are no current plans to repatriate the remaining funds in a manner that results in tax consequences.

Liquidity and Capital Resources

Cash Requirements

Contractual Obligations and Other Commitments

Our contractual obligations and other commitments detailed on page 76 of our 2014 AIR summarize certain of our liquidity and capital resource requirements, excluding obligations that have original maturities of less than one year, planned (but not legally committed) capital expenditures or potential share repurchases. The issuance of \$500 million of 3.00 percent senior notes due April 1, 2025 during the first quarter of 2015 increased our long-term debt obligations (\$500 million) and total estimated interest payments on long-term debt obligations (\$150 million) in the contractual obligations and other commitments table referenced above.

Capital Expenditures

2015 Forecast Capital Expenditures¹ (\$ millions)

¹ Includes capitalized interest and is based on a forecast exchange rate of 1.23 Canadian dollars per US dollar.

² To sustain operations at existing levels and for major repairs and maintenance, including plant turnarounds.

Page 51 of our 2014 AIR outlines key potash construction projects and their expected total cost, as well as the impact of these projects on capacity expansion/debottlenecking and any expected remaining spending on each project still in progress. The most significant of these potash projects⁽¹⁾ on which funds are expected to be spent in 2015, excluding capitalized interest, are outlined in the table below:

CDN Dollars (billions)	2015 Forecast	Total Forecast ⁽²⁾	Started	Construction Completion ⁽³⁾ (Description)	Forecasted Remaining Spending (after 2015) ⁽²⁾
New Brunswick ⁽⁴⁾	\$0.1	\$2.2	2007	2014 (mine shaft and mill completed)	\$0.2
Rocanville, Saskatchewan	\$0.2	\$2.9	2008	2015 (mine shaft and mill)	\$ —

⁽¹⁾ The expansion at each of these projects is discussed in the technical report for such project filed on SEDAR in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects.

⁽²⁾ Amounts are based on the most recent forecasts approved by the Board of Directors, and are subject to change based on project timelines and costs.

⁽³⁾ Construction completion does not include ramp-up time.

⁽⁴⁾ Remaining expenditures at New Brunswick relate to port and other site infrastructure required for ramp-up.

In 2013, we began a brownfield expansion at our Lima facility that is expected to add approximately 100,000 tonnes of ammonia capacity and approximately 73,000 tonnes of urea capacity by the fourth quarter of 2015 at an estimated cost of approximately \$230 million. We expect to spend approximately \$80 million in 2015 related to this expansion.

We anticipate that all capital spending will be financed by internally generated cash flows supplemented, if and as necessary, by borrowing from existing financing sources.

Sources and Uses of Cash

The company's cash flows from operating, investing and financing activities are summarized in the following table:

Dollars (millions), except percentage amounts	Three Months Ended June 30				Six Months Ended June 30			
	2015	2014	Change	% Change	2015	2014	Change	% Change
Cash provided by operating activities	\$ 836	\$ 788	\$ 48	6	\$1,357	\$ 1,327	\$ 30	2
Cash used in investing activities	(304)	(207)	(97)	47	(537)	(433)	(104)	24
Cash used in financing activities	(300)	(1,007)	707	(70)	(586)	(1,415)	829	(59)
Increase (decrease) in cash and cash equivalents	\$ 232	\$ (426)	\$658	n/m	\$ 234	\$ (521)	\$ 755	n/m

n/m = not meaningful

Changes in Cash Flows Three Months Ended June 30, 2014 vs 2015 (\$ millions)

Changes in Cash Flows Six Months Ended June 30, 2014 vs 2015 (\$ millions)

The most significant contributors to the changes in cash flows were as follows:

	Quarter over Quarter	Year over Year
Cash Provided by Operating Activities	<p>Cash provided by operating activities was impacted by:</p> <ul style="list-style-type: none"> Lower net income in 2015; and Cash inflows from payables and accrued charges in 2015 compared to cash outflows in 2014. 	<p>Cash provided by operating activities was impacted by:</p> <ul style="list-style-type: none"> Lower net income in 2015; Cash inflows from receivables in 2015 compared to cash outflows in 2014; Higher cash inflows from payables and accrued charges in 2015; and Cash outflows from inventories in 2015 compared to cash inflows in 2014.
Cash Used in Investing Activities	Cash used in investing activities was primarily for additions to property, plant and equipment.	
Cash Used in Financing Activities	<p>Cash used in financing activities decreased due to share repurchases and repayment of senior notes in the second quarter of 2014 not recurring in 2015, partially offset by commercial paper issuances in the second quarter of 2014 not recurring in 2015.</p>	<p>Cash used in financing activities decreased due to share repurchases and repayment of senior notes in the first half of 2014 not recurring in 2015, partially offset by lower proceeds from senior notes and higher commercial paper repayments in the first half of 2015 compared to 2014.</p>

We believe that internally generated cash flow, supplemented if necessary by available borrowings under our existing financing sources, will be sufficient to meet our anticipated capital expenditures and other cash requirements for at least the next 12 months, exclusive of any possible acquisitions. At this time, we do not reasonably expect any presently known trend or uncertainty to affect our ability to access our historical sources of liquidity.

Cash Additions to Property, Plant and Equipment (percentage)

Working Capital

Capital Structure and Management

Principal Debt Instruments

Credit Facility ⁽¹⁾ (\$ millions) At June 30, 2015

Line of Credit (\$ millions) At June 30, 2015

⁽¹⁾ The authorized aggregate amount under the company's commercial paper programs in Canada and the US is \$2,500 million. The amounts available under the commercial paper programs are limited to the availability of backup funds under the credit facility. Included in the amount outstanding and committed is \$NIL of commercial paper.

We use a combination of cash generated from operations and short-term and long-term debt to finance our operations. We typically pay floating rates of interest on our short-term debt and credit facility borrowings, and fixed rates on our senior notes.

During the second quarter of 2015, there were no significant changes to the nature of our outstanding commercial paper, including interest rates, syndicated credit facility, short-term line of

credit and uncommitted letter of credit facility described on Page 79 in our 2014 AIR.

The line of credit and credit facility have financial tests and covenants, including consequences of non-compliance, referenced on page 79 of our 2014 AIR, with which we must comply at each quarter-end. We were in compliance with all covenants as at June 30, 2015 and at this time anticipate being in compliance with such covenants through 2015.

The accompanying table summarizes the limits and results of certain covenants:

Debt covenants at June 30

Dollars (millions), except ratio amounts	Limit	2015
Debt-to-capital ratio ⁽¹⁾	≤ 0.6	0.3
Long-term debt-to-EBITDA ratio ⁽²⁾	≤ 3.5	1.1
Debt of subsidiaries	<\$ 1,000	\$ 6

The following non-IFRS financial measures are requirements of our debt covenants and should not be considered as substitutes for, nor superior to, measures of financial performance prepared in accordance with IFRS:

- ⁽¹⁾ Debt-to-capital ratio = debt (short-term debt and current portion of long-term debt + long-term debt) / (debt + shareholders' equity).
- ⁽²⁾ Long-term debt-to-EBITDA ratio = long-term debt / EBITDA. EBITDA is calculated according to the definition in Note 17 to the 2014 audited annual consolidated financial statements for the trailing 12 months. As compared to net income according to IFRS, EBITDA is limited in that periodic costs of certain capitalized tangible and intangible assets used in generating revenues are excluded. Long-term debt to net income for the trailing 12 months was 2.5.

Our ability to access reasonably priced debt in the capital markets is dependent, in part, on the quality of our credit ratings. We currently maintain investment-grade credit ratings for our long-term debt. A downgrade of the credit rating of our long-term debt would increase the interest rates applicable to borrowings under our credit facility and our line of credit.

Commercial paper markets are normally a source of same-day cash for the company. Our access to the Canadian and US commercial paper markets primarily depends on maintaining our current short-term credit ratings as well as general conditions in the money markets.

	Long-Term Debt		Short-Term Debt	
	Rating (Outlook)		Rating	
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014
Moody's	A3 (negative)	A3 (stable)	P-2	P-2
Standard & Poor's	A- (stable)	A- (stable)	A-2 ⁽¹⁾	A-2 ⁽¹⁾
DBRS	n/a	n/a	R-1 (low)	R-1 (low)

⁽¹⁾ S&P assigned a global commercial paper rating of A-2, but rated our commercial paper A-1 (low) on a Canadian scale.

n/a = not applicable

A security rating is not a recommendation to buy, sell or hold securities. Such rating may be subject to revision or withdrawal at any time by the respective credit rating agency and each rating should be evaluated independently of any other rating.

Our \$4,250 million of outstanding senior notes were issued under US shelf registration statements.

For the first six months of 2015, our weighted average cost of capital was 6.9 percent (2014 – 9.5 percent), of which 86 percent represented the cost of equity (2014 – 88 percent).

Outstanding Share Data

	June 30, 2015	December 31, 2014
Common shares issued and outstanding	834,648,800	830,242,574
Options to purchase common shares outstanding	20,506,625	20,909,835
Number of stock option plans	10	10

Off-Balance Sheet Arrangements

Off-balance sheet arrangements are described on page 80 of our 2014 AIR. We do not reasonably expect any presently known trend or uncertainty to affect our ability to continue using these arrangements. Refer to Note 11 to the financial statements in this Form 10-Q for a contingency related to Canpotex. Refer to page 80 of our 2014 AIR for information pertaining to our guarantees and derivative instruments. See "Cash Requirements" above and our 2014 AIR for obligations related to operating leases and certain of our long-term raw materials agreements that contain fixed price and/or volume components.

Quarterly Financial Highlights

Dollars (millions), except per-share amounts	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014	June 30, 2014	March 31, 2014	December 31, 2013	September 30, 2013
Sales	\$1,731	\$1,665	\$1,902	\$1,641	\$1,892	\$1,680	\$1,541	\$1,520
Gross margin	711	667	746	589	747	565	460	484
Net income	417	370	407	317	472	340	230	356
Net income per share – basic ⁽¹⁾	0.50	0.45	0.49	0.38	0.56	0.40	0.27	0.41
Net income per share – diluted ⁽¹⁾	0.50	0.44	0.49	0.38	0.56	0.40	0.26	0.41

⁽¹⁾ Net income per share for each quarter has been computed based on the weighted average number of shares issued and outstanding during the respective quarter, including the dilutive number of shares assumed for the diluted earnings per share computation; therefore, as the number of shares varies each period, quarterly amounts may not add to the annual total.

Refer to Note 10 to the financial statements in this Form 10-Q for information pertaining to sales that can be seasonal.

Other Financial Information

Related Party Transactions

Refer to Note 12 to the financial statements in this Form 10-Q for information pertaining to transactions with related parties.

Critical Accounting Estimates

There have been no material changes to our critical accounting estimate policies in the first six months of 2015.

We have discussed the development, selection and application of our key accounting policies, and the critical accounting estimates and assumptions they involve, with the audit committee of the

Board of Directors, and the committee reviewed the disclosures described in this Form 10-Q.

Recent Accounting Changes

Refer to Note 1 to the financial statements in this Form 10-Q for information on issued accounting pronouncements that will be effective in future periods. There are no accounting changes effective in 2015.

Outlook

Potash Market Outlook

Our expectations of global potash demand remain unchanged as we anticipate 2015 shipments of approximately 60 million tonnes.

In North America, demand for our summer-fill program has been strong. We expect shipments in this market to accelerate through the remainder of the year, although competitive pressures have resulted in lower prices than recognized during the first six months. We now expect total 2015 shipments of 9.0-9.5 million tonnes.

In Latin America, we anticipate strong third-quarter demand ahead of its key planting season. However, reduced credit availability and currency weakness in Brazil could slow purchases compared to the record pace in 2014. For the full year, we now forecast shipments of 10.6-11.1 million tonnes for this region.

In China, strong shipments are expected through the second half as suppliers deliver against significant annual contracted volumes. Rising demand in China for compound fertilizers and bulk blends with higher potassium content is expected to require optional tonnage deliveries and push Canpotex sales volumes above its 1.8 million tonne minimum. Based on this strength – and increased domestic production – we now expect total shipments to reach 14.2-14.7 million tonnes.

In India, potash demand continues to improve without meaningful subsidy change. Robust demand for direct application and compound fertilizers – as well as a later first-half contract settlement – is expected to result in significant Canpotex shipments through the rest of 2015. We maintain our full-year shipment estimate of 4.5-5.0 million tonnes and believe total deliveries could reach the upper end of our range.

In Other Asian countries (outside of China and India), we maintain our estimate for shipments of 8.4-8.8 million tonnes. Significant competitive pressures and currency volatility could weigh on prices in these markets through the balance of the year.

Financial Outlook

With the first half behind us, we have revised our full-year expectations for our potash business. Our full-year sales volumes estimate has been narrowed to 9.3-9.6 million tonnes and – due to a decline in certain spot market prices through the second quarter – we have lowered the upper end of our previous potash gross margin range, now forecast at \$1.5-\$1.7 billion.

We maintain our combined nitrogen and phosphate gross margin estimate of \$1.0-\$1.2 billion in 2015. In nitrogen, we expect greater supply will lead to a more subdued market and weaker prices relative to 2014, although lower natural gas prices are expected to keep cost of goods sold below last year's level. In phosphate, a shift to a more profitable product mix and supportive market fundamentals are expected to keep realizations above those of 2014. Additionally, we expect to benefit from per-tonne costs trending lower through the balance of the year on improved mining conditions at Aurora.

We have increased our estimate of income from offshore equity investments to a range of \$190-\$210 million due to increased dividend income from ICL in the first half of the year. Selling and administrative expenses are now forecast in the range of \$235-\$245 million and finance costs are now expected to be in the range of \$190-\$200 million.

As a result of the noted changes, we have revised our full-year 2015 earnings guidance to \$1.75-\$1.95 per share. For the third quarter, we forecast a range of \$0.35-\$0.45 per share.

Forward-Looking Statements

Certain statements in this Quarterly Report on Form 10-Q, including those in the “Outlook” section of Management’s Discussion and Analysis of Financial Condition and Results of Operations, contain forward-looking statements or forward-looking information (“forward-looking statements”). These statements can be identified by expressions of belief, expectation or intention, as well as those statements that are not historical fact. These statements often contain words such as “should,” “could,” “expect,” “may,” “anticipate,” “believe,” “intend,” “estimates,” “plans” and similar expressions. These statements are based on certain factors and assumptions as set forth in this Form 10-Q, including with respect to: foreign exchange rates, expected growth, results of operations, performance, business prospects and opportunities, and effective tax rates. While the company considers these factors and assumptions to be reasonable based on information currently available, they may prove to be incorrect. Forward-looking statements are subject to risks and uncertainties that are difficult to predict. The results or events set forth in forward-looking statements may differ materially from actual results or events. Several factors could cause actual results or events to differ materially from those expressed in forward-looking statements including, but not limited to, the following: variations from our assumptions with respect to foreign exchange rates, expected growth, results of operations, performance, business prospects and opportunities, including our proposal to acquire K+S Aktiengesellschaft (K+S), and effective tax rates; fluctuations in supply and demand in the fertilizer, sulfur, transportation and petrochemical markets; changes in competitive pressures, including pricing pressures; costs and availability of transportation and distribution of our raw materials and products, including railcars and ocean freight; risks and uncertainties related to operating and workforce changes made in response to our industry and the markets we serve; risks and uncertainties related

to our international operations and assets; failure to prevent or respond to a major safety incident; adverse or uncertain economic conditions and changes in credit and financial markets; the results of sales contract negotiations within major markets; economic and political uncertainty around the world; risks associated with natural gas and other hedging activities; changes in capital markets; unexpected or adverse weather conditions; catastrophic events or malicious acts, including terrorism; changes in currency and exchange rates; imprecision in reserve estimates; adverse developments in new and pending legal proceedings or government investigations; our prospects to reinvest capital in strategic opportunities and acquisitions, including our proposal to acquire K+S; our ownership of noncontrolling equity interests in other companies; the impact of further technological innovation; increases in the price or reduced availability of the raw materials that we use; security risks related to our information technology systems; strikes or other forms of work stoppage or slowdowns; timing and impact of capital expenditures; rates of return on, and the risks associated with, our investments and capital expenditures; changes in, and the effects of, government policies and regulations; certain complications that may arise in our mining process, including water inflows; our ability to attract, retain, develop and engage skilled employees; risks related to reputational loss; and earnings and the decisions of taxing authorities, which could affect our effective tax rates. Additional risks and uncertainties can be found in our Form 10-K for the fiscal year ended December 31, 2014 under the captions “Forward-Looking Statements” and “Item 1A – Risk Factors” and in our filings with the US Securities and Exchange Commission and the Canadian provincial securities commissions. Forward-looking statements are given only as at the date of this report and the company disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential for loss from adverse changes in the market value of financial instruments. The level of market risk to which we are exposed varies depending on the composition of our derivative instrument portfolio, as well as current and expected market conditions. A discussion of enterprise-wide risk management can be found in our 2014 AIR, pages 21 to 25.

Price, foreign exchange and interest rate risks faced by the company and how we manage those risks are outlined in Notes 19 and 25 to the 2014 audited annual consolidated financial statements and there were no significant changes as at June 30, 2015.

Price Risk

There were no substantial changes to the price sensitivities related to our available-for-sale investments and natural gas derivatives reported in Note 25 to the 2014 audited annual consolidated financial statements. As at June 30, 2015, the company's net exposure to natural gas derivatives in the form of swaps was a notional amount of 96 million MMBtu (December 31, 2014 – swaps and futures a notional amount of 101 million MMBtu) with maturities in 2015 through 2022.

Foreign Exchange Risk

There were no substantial changes to the foreign exchange sensitivities reported in Note 25 to the 2014 audited annual consolidated financial statements. As at June 30, 2015, the company had entered into foreign currency forward contracts to sell US dollars and receive Canadian dollars in the notional amount of \$114 million (December 31, 2014 – \$140 million) at an average exchange rate of 1.2381 (December 31, 2014 – 1.1403) per US dollar with maturities in 2015.

Interest Rate Risk

As at June 30, 2015, the company had no significant exposure to interest rate risk.

Item 4. Controls and Procedures

As of June 30, 2015, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon that evaluation and as of June 30, 2015, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports the company files and submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as and when required and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There has been no change in our internal control over financial reporting during the quarter ended June 30, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

For a description of certain other legal and environmental proceedings, see Note 11 to the unaudited interim condensed consolidated financial statements included in Part I of this Quarterly Report on Form 10-Q.

Item 4. Other Information

Mine Safety Disclosures

Safety is the company's top priority, and we are committed to providing a healthy and safe work environment for our employees, contractors and all others at our sites to help meet our company-wide goal of achieving no harm to people.

The operations at the company's Aurora, Weeping Water and White Springs facilities are subject to the *Federal Mine Safety and Health Act of 1977*, as amended by the *Mine Improvement and New Emergency Response Act of 2006*, and the implementing regulations, which impose stringent health and safety standards on numerous aspects of mineral extraction and processing operations, including the training of personnel, operating

procedures, operating equipment and other matters. Our Senior Safety Leadership Team is responsible for managing compliance with applicable government regulations, as well as implementing and overseeing the elements of our safety program as outlined in our Safety, Health and Environment Manual.

Section 1503(a) of the *Dodd-Frank Wall Street Reform and Consumer Protection Act* (Section 1503(a)) requires us to include certain safety information in the periodic reports we file with the United States Securities and Exchange Commission. The information concerning mine safety violations and other regulatory matters required by Section 1503(a) and Item 104 of Regulation S-K is included in Exhibit 95 to this Quarterly Report on Form 10-Q.
